This is a detailed architectural floor plan for a single-story house. The layout includes a large 2-car garage (20' x 21') on the right side, which has a covered entry leading into a foyer. The foyer connects to a flex room (11' x 14') and a central hallway. The flex room has a closet and a door leading to a powder room (PWDR.) containing a toilet, sink, and fan. The main living area consists of a great room (15' x 17') with a fireplace on the right wall, a breakfast room (12' x 13') with a table and chairs, and a kitchen (12' x 13') with a sink, stove, and refrigerator. A pantry is located between the kitchen and the flex room. A central staircase with a railing leads to an upper level. The plan also shows a covered entry at the bottom, a concrete pad (5' x 5') at the top, and various mechanical details like pipes, valves, and electrical outlets. The overall design is functional and spacious, with a mix of open-plan living and private areas.
